

# User Guide

**eos time**

## THANK YOU!

for purchasing the **Ideon Audio eos time**.

This device is among the highest performing precision USB Re-Clocking platforms available today.

The eos time uses proprietary circuit design and component selection; in action it dramatically improves the sound from digital computer audio files, music streaming services (like Spotify, iTunes, Tidal, etc.), even from low-res audio-vid (e.g. youtube) playbacks!

## **eos time**

Ideon Audio's eos time connects between the digital output like a computer or a music server, and the DAC. It achieves amazing sound performance by uncovering lost detail, enhancing dynamics, re-clocking the signal using ultra-low jitter oscillators, and minimizing transmission losses. The performance enhancements are immediately evident and phenomenal.

Cutting edge technology: based on Ideon Audio's proprietary design, the eos time, deploys

- Triple ultra-low noise linear power supply
- Femto, ultra-low noise phase clock
- Dual re-drive signal conditioning chip
- Modular digital core for future updates

The eos time's secondary but very important function is that it disconnects the computer's noisy 5v bus power coming down the USB cable, providing clean 5v BUS to its output - for DACs that need it and can benefit from this feature! - via a second ultra-low-noise regulator.

Ideon Audio's eos time connects between the digital output like a computer or a music server, and the DAC. It achieves amazing sound performance by uncovering lost detail, enhancing dynamics, re-clocking the signal using ultra-low jitter oscillators, and minimizing transmission losses. The performance enhancements are immediately evident and phenomenal.

**Cutting edge technology:** based on Ideon Audio's proprietary design, the eos time, deploys

- Triple ultra-low noise linear power supply
- Femto, ultra-low noise phase clock
- Dual re-drive signal conditioning chip
- Modular digital core for future updates

The eos time's secondary but very important function is that it disconnects the computer's noisy 5v bus power coming down the USB cable, providing clean 5v BUS to its output - for DACs that need it and can benefit from this feature! - via a second ultra-low-noise regulator.

In the rear panel of the device there is a 5v on switch – as seen in illustration below. With this switch set to the on position, the 5v power rail is on – to the USB cable (power goes through the USB cable).

When not set to the on position, the 5v power rail is cut off from the USB cable resulting in better, cleaner data transmission. This switch is included as some DACs do not provide power to the USB

cable; it can also help you to experiment with different USB cables. Unless necessary, however, we recommend you leave this power rail off.

In the rear panel as shown in the illustration below, you will also find the USB In and Out sockets (to connect the host and the DAC with the corresponding USB cables) and the On/Off switch of the device.

In the front panel of the device as shown in the illustration below there are 3 indicator lights:

- the power light shows that the device is on
- the lock light shows that the eos time has successfully connected to the DAC
- the host light shows that the the eos time has successfully connected to the computer

## Safety Instructions

- WARNING. TO REDUCE THE RISK OF FIRE OR ELECTRICAL SHOCK, DO NOT EXPOSE THIS DEVICE TO RAIN OR MOISTURE.
- Clean only with a dry cloth. Do not place flammable material on or underneath this device.
- Do not remove or bypass the ground pin on the end of the AC cord unless necessary to reduce hum from ground loops of connected equipment. Disconnecting the ground may cause RFI (radio frequency interference) to be induced into your playback setup. Removing or bypassing the ground pin on any electrical component is potentially dangerous and should be avoided for safety reasons.
- Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus. Unplug this apparatus during lightning storms or when unused for long periods of time.

## Servicing

THERE ARE NO USER-SERVICEABLE PARTS INSIDE ANY IDEON AUDIO PRODUCT. PLEASE REFER ALL SERVICING TO QUALIFIED PERSONNEL.

Please contact your authorized dealer, distributor, or Ideon Audio if you have any questions not addressed in this reference document.

## Warranty

Ideon Audio provides a 2-year manufacturer's warranty on all new Ideon Audio components.

The Ideon Audio seven (7) year and extended Lifetime Limited Warranty

You can extend the standard 2-year manufacturer's warranty into a 7-year warranty by registering your product with us. To do that, you need to send us your Name, Address, tel., email and the proof of purchase in the form of a bill of sale, invoice (or copy thereof) from the Ideon Audio dealer or Distributor. For further detail please contact your dealer or refer to Ideon Audio's official site.

Furthermore, Ideon Audio also offers a Lifetime product warranty that can be purchased at 17,5% of the retail price for any of our products. Please coordinate with your dealer or local distributor for that.

The Ideon Audio limited warranty covers defects in the materials and workmanship in this product. Under the terms of this warranty we will repair the product free of charge (parts and labour) — or replace it where we deem that repair is not possible — for malfunction due to inherent defects in the materials or construction.

Ideon Audio has authorized distribution in many countries of the world. Warranty service should be obtained directly from the importing retailer or distributor from whom you

purchased the product. In the unlikely event of service required beyond the capabilities of the importer, Ideon Audio undertakes to fulfill the conditions of the warranty. In case of malfunction please contact your dealer to arrange for service. If you have purchased the product directly from Ideon Audio, please contact us directly at info@ideonaudio.com, quoting subject: fault and a short description of the issue. Please note that the product must be returned using original packaging only and accompanied by a written description of the issue, defect, or malfunction.

### **\*Products covered by the extended, lifetime warranty.**

- This specially extended warranty covers the lifetime of the product model.
- This warranty is transferable under condition that each new owner informs Ideon Audio importers, dealers, or Ideon Audio directly the device model, number, previous owner name & new owner name & address.
- In cases of obsolescence of materials or superseded technology, the product will be repaired using currently available materials and technology of equivalent performance characteristics, or better.
- "Future proof": if Ideon Audio releases upgrades to, or improved versions of, the purchased product, these are made available to subscribers at cost of parts and materials only. Shipping to the service location is borne by the owner, Ideon Audio or its distributors / dealers pay for return shipping.

### **\*This warranty is voided in cases of**

- Damage and /or malfunction caused by tampering or modifications to the product's original state, attempts to fix, or other alterations to the product by persons other than factory authorized service personnel.
- Failure to comply fully with Ideon Audio operating instructions.
- Damage to cables or attachments and cosmetic damage induced by use.
- Damage and /or malfunction caused by improper use, abuse, or improper operation of the product.
- Products obtained outside the network of authorized Ideon Audio dealers and resellers.

### **General Warranty Terms.**

This Warranty is subject to the following conditions and limitations: The Warranty is void and inapplicable if the product has been used or handled other than in accordance with the instructions in this document, abused, or misused, damaged by accident or neglect or in being transported, or the defect is due to the product being repaired or tampered with by anyone other than Ideon Audio or an authorized Ideon Audio repair center.

- The product must be packaged and returned to Ideon Audio or an authorized Ideon Audio repair center by the customer at his or her sole expense in the original packing material. Ideon Audio will pay return freight of its choice for original purchasers.
- Returned product must be accompanied by a written description of the issue or the defect. Ideon Audio reserves the right to modify the design of its products without obligation to purchasers of previously manufactured products and to change the price or specifications of any product without notice or obligation to any person.
- In the event the product fails to meet this Warranty and the above conditions have been met, the purchaser's sole remedy under this Limited Warranty shall be to return the product to Ideon Audio or an authorized Ideon Audio repair center where the defect will be repaired without charge for parts or labor.
- This warranty does not cover the cost of custom installation, customer instruction and setup adjustments.
- This warranty does not cover cosmetic damage or any damage due to accident, misuse, abuse, negligence or modification of, or to any part of the Product, without initial express consent from Ideon Audio. This warranty does not cover damage due to improper operation or maintenance, connection to improper voltage supply, or attempted repair by anyone other than a facility authorized by Ideon Audio to service the Product.

Enjoy the music, enjoy hi-definition in music!
