Alpha Wave LAN optimizer to USB

Thank you for purchasing the Iideon Audio **Alpha Wave** LAN optimizer to USB.

The Alpha Wave LAN Optimizer to USB is a groundbreaking solution that revolutionizes the extraction of music data from mediums not initially designed for music reproduction.

Designed to interface seamlessly with your Streamer or Music Server via a USB 3.0 connection (rather than LAN connection), this device guarantees uninterrupted gigabit LAN performance. By integrating a femto clock as a master timing device and employing premium hi-end components, we elevate our design to unmatched quality levels. Essentially, we refine the LAN-originated signal before it reaches the streaming device, through a USB 3.0 connection.

Connecting the Alpha Wave

Please complete all necessary connections (see pictures below) before connecting the power cord to the mains.

Once all connections are made, connect the power cord to the mains and switch the device on, as shown.

Back panel

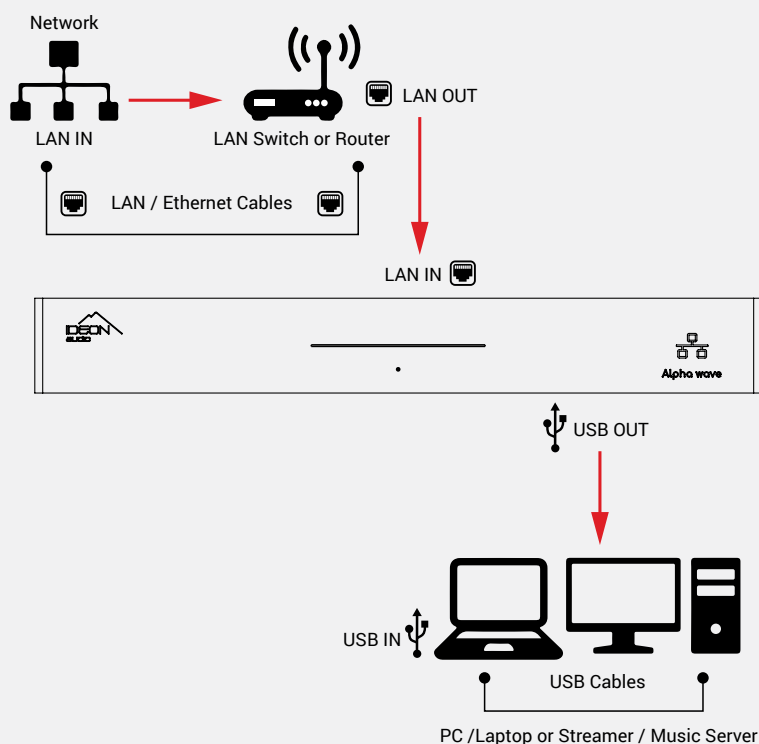

Power On / Off

To power on the device, lift the on/off (power) switch to the "ON" position located at the back of the device, as shown in the photo. A white LED light at the center of the front face will indicate that the device is on. The long white LED strip on the front faceplate indicates that the device is operating normally, and that the USB signal is passing through. To turn off the Sigma Wave, use the same on/off switch at the back of the unit and move it to the "OFF" position.

Safety Instructions

- WARNING. TO REDUCE THE RISK OF FIRE OR ELECTRICAL SHOCK, DO NOT EXPOSE THIS DEVICE TO RAIN OR MOISTURE.
- Clean only with a dry cloth. Do not place flammable material on or underneath this device.
- Do not remove or bypass the ground pin on the end of the AC cord unless necessary to reduce hum from ground loops of connected equipment. Disconnecting the ground may cause RFI (radio frequency interference) to be induced into your playback setup. Removing or bypassing the ground pin on any electrical component is potentially dangerous and should be avoided for safety reasons.
- Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus. Unplug this apparatus during lightning storms or when unused for long periods of time.
